

PRECISION BORING HEAD

MODEL DR 1

to $\varnothing 20$ mm

Order No. DR 1

Facts

This fine boring head has been designed for precision holes with close tolerances and high surface qualities.

Special advantages

- Feed accuracy of 0,01 mm \varnothing (1 stroke = 0,01/ \varnothing), using a fine adjustable micrometer spindle with easy-to-read scale.
- Fine adjustment is possible while retaining the high repetitive accuracy.
- High rigidity thanks to its shortness and its dovetail guideway, ground to be free of play.
- Boring capacity to $\varnothing 20$ mm
